eyeHear for Orgs: the one-page brief

eyeHear, LLC

Real-time captions for the devices you already manage. Press and hold, and eyeHear shows what the person in front of you is saying in large, easy-to-read text. It gives each deaf or hard-of-hearing person you serve or employ another way to follow a conversation.

What a license adds

eyeHear is free on the App Store, and captioning never depends on a license. A license adds control and the documents your reviewers ask for.

- **Sharing off.** Removes every share control from the app.
- **Caption history.** Whether it is kept, for how long, and whether it is backed up.
- **On-device recognition.** Require it, so speech is never sent to a server for recognition.
- **Your organization's name.** The app checks on the device itself, with no network call, that it belongs to your organization, and shows your organization's name in Settings.

Install through your MDM (mobile device management). We have tested Jamf Pro and ManageEngine, and any MDM that supports managed app configuration works. Policy is enforced on the device.

eyeHear receives no audio and no captions. The VPAT is public. The HECVAT is in your portal as soon as you register and accept the evaluation agreement.

Published prices

	Starts at	Per device, per year	How you buy
eyeHear for Orgs	$240 a year	$120 for 2 to 99 devices, $105 for 100 to 499, $95 for 500 to 1,499, and $85 for 1,500 or more. The whole fleet is billed at its band's rate.	By card in the portal, for 2 to 4,999 devices.
eyeHear for Enterprise	From $25,000 a year, organization-wide	The same per-device rates, or organization-wide: up to 6,250 employees, then $4 per employee a year. You pay whichever costs less.	Invoice, purchase order, or signed order form, and a person to work with.

Start with a free evaluation

A free 30-day evaluation, plus one 30-day extension if you need it. Register, accept the evaluation agreement, and get a token for your MDM and the documents for your reviewers. No charge, no call. Start at eyehear.app/organizations. A question first? Use eyehear.app/support/contact.

Before you rely on captions. eyeHear is an aid for everyday conversation, not a substitute for a qualified human interpreter or CART provider, and not a formal accommodation on its own. Captions can be wrong, especially with strong accents, fast speech, or noisy rooms. Don't rely on eyeHear alone when a mistake could cause serious harm, such as emergency instructions, informed consent, or medication instructions.
